

PAJU Design
Belgium

OUR MISSION

PAJU Design is the contemporary Belgian brand that helps you create imaginative and stylish outdoor living spaces in your own home. Inspired by the global trend towards embracing the outdoors as an extension of your personal living space, our brand is a fresh new look in your outdoor style. You will find well designed products which combine striking and timeless appearance with quality finishes and materials to deliver the 'wow factor', you and visitors to your home will admire.

The whole PAJU Design team believes in gaining success by being honest. We always dreamt of creating a great brand that can be trusted to serve all of your needs and at the same time be reliable in order to provide value to you, our clients. It is critical for the success of this brand to consistently show high transparency across our range of products.

Style and quality in combination with eco-friendly mindset is key for our Belgian Design team. Discover our catalogue and be immersed by the PAJU feeling.

Think outside.

DIFFUSER COLLECTION

Our PAJUDesign diffusers will be the perfect accessory to complete your indoor space. They combine the two best things about PAJU Design: stylish ceramics and heavenly scents. Equipped with beautiful, high quality black rattan sticks, our diffusers are not only a gift for the nose, but also to the eyes.

Serving as unique decoration in your home, they will add personality to every room in the house. Our in-house designed ceramics will diffuse an inviting smell that defines the way you want people to remember you. Let us present you our 3 scents:

Amber & Patchouli

Amber & Patchouli smells spicy with a light woody scent. You can also detect slightly leathery and even sweet notes. It has a dark character and brings depth and sensuality to perfumes. Above all, patchouli gives a perfume a soothing and luxurious touch.

Black Pepper Tea Leafs

Black pepper is often used in perfume because of the ability to connect the top and bottom notes of the perfume composition in a fresh, yet bold way. Blended with tea leaves, it gives you that real garden feeling.

Red Vetiver

The vetiver in this fragrance is an earthy, grassy, green scent which feels very refined; a secondary note is the cedar: a bright, fresh, and woody note.

Each diffuser comes with one scent of choice, but you can easily order refills. Presented in 250ml bottles which will produce scent up to three months after first use (depending on the room conditions). For an enhanced scent experience you can regularly turn the sticks, although it will shorten the lifetime by just a little bit.

INDOOR CANDLE COLLECTION

PAJU Design indoor candles are refined, high quality candles made from pure, high quality wax. Our indoor candles are filled right here in Belgium, with traditionally moulded black paraffine. In combination with wooden wicks, which crackle as they burn, or high quality cotton wicks, they provide a great atmosphere in every home. This combination of the wicks and wax guarantees an even burn all over the surface. Our candles are delivered in original ecofriendly packaging.

Did you know that decorating your home creates a personal and stylish atmosphere? Our different fragrances will provide your home with a smell and atmosphere of your choice.

Enjoy!

LEATHERY NOTES SCENT

A subtle hint of smoke and fresh leather combined with burned wood provide an excellent fragrance for your home. Amaze your guests with this soft, yet creamy scent.

Our leathery notes collection is the perfect fit for a cosy evening. The candles on the following pages are scented with this great perfume.

OUR SOCIAL PROMISE

A great deal of our production process is being handled by a social atelier. Here at PAJU we believe in collaboration and that we as a company have a social duty to fulfill.

A healthy development of people and materials is something we try to improve on every day. We are not there yet, but we are well on our way.

HERITAGE SCENT

The candles displayed on the next pages are fragranced with a 100% perfume mix of bergamot, ginger, patchouli, coriander and sandalwood.

An easy going blend which allows you to burn the candles at any given occasion. A nice meal with friends or just a cosy evening, our candles will let you enjoy every moment of it.

COVERED CANDLES

We care about looks. The covers we use will reinforce the candles' understated elegance.

Our Spotty and Lines collection are as pleasant to the eye as they are to your soul. After burning, simply put the cover on top of the candle to cease the fire.

OUTDOOR CANDLE COLLECTION

The exterior of the outdoor candles are made from sustainable materials, while the pure wax is made from black paraffin. PAJU Design is an exclusive addition for your outdoor furniture set, handcrafted to create an enchanted and relaxed atmosphere. Choosing PAJU products creates a warm and homelike feeling in your outdoor areas and it will invite your guests to sit down and enjoy moments together.

Can you think of something better than spending cosy winter nights with your friends and family in the open air? Enjoy your garden and terrace with our beautiful designs.

CONCRETE IN ALL ITS FORMS

One of the materials we use for our outdoor candles is concrete. We try to take pride in using it all its shapes and forms. Always reinforced with fiberglass, it is sturdy, durable but always elegant. Whether it is coated concrete or natural, our (coated) concrete candles will never cease to amaze you with their unique style

WICKS AND SIZES

All our outdoor candles are equipped with high quality cotton wicks, in order to ensure perfect burning. The wicks are matched with the size of each candle.

Speaking of sizes, all our series have either 2 or 3 different sizes. Line them up next to each other and let them form the ultimate outdoor candle setting.

STUNNING CERAMICS

PAJU Design ceramic outdoor candles are vastly different from the standard, ceramic outdoor candles.

Beautiful, well thought design and earthy colors are truly a winning combination.

BURNING HOURS

We want you to enjoy your candles as long as possible. That is exactly why the quality of the wax and wicks are one of PAJU Design's main priorities.

We invest a great deal of time into the optimisation of the burn time of our candles. We can ensure that you have an even burning surface, in order for you to fully enjoy your candle.

BEAN

Burn time: 24 hours.
Dimensions: 16x9x1cm.
Material: Natural Wax
Scent: Coffee Beans
EAN: 0722777098317

PAJU Design does not have the habit of including insect repellent scents to its outdoor candles. Rather, we feel that people should be given the choice to use it, based on the occasion. That is why PAJU Design developed insect repellent bars made of natural wax, including 25% perfume for a real scent boost.

Transform your outdoor candle into a mosquito (Nella) or wasp (Bean) repellent device whenever you want! Looking like chocolate bars, break off one or two pieces (depending on the size of your candle) and place them next to the wick when lighting your candle. The wax will melt and mingle into the melt pool of your PAJU Design candle and give you the insect repellent boost you need. Keep adding pieces into the melt pool for continued use or just stop using and the scent will wear off.

OUTDOOR RUGS

Because we see the outdoor living area as an extension of the indoor living area, we created our own unique range of outdoor rugs to complement your outdoor terrace or lounge. They are the perfect match for our outdoor candles, as well in style as in color. Designed in Belgium by us, these high quality PET yarn rugs have been made from recycled bottles. Woven on Dhurrie looms with the utmost precision and care.

They are soft but durable. Easy to clean but very nice on the eye.

We hope you sense the pride we take in talking about our rugs. They are truly unique!
Be the first to discover this new collection.
